

FOR IMMEDIATE RELEASE

GPC Systems reaches Gold!

VIENNA, VA, August 24, 2006 – GPC Systems, Inc., a leading developer of custom business management solutions, today received its Microsoft Gold Certification. “We have been a Microsoft partner for more than 15 years and have worked for a long time to earn this certification,” said Guy Caron, CEO of GPC Systems. “We have a dedicated and creative staff at GPC, and through their efforts, we’ve achieved the Microsoft Gold Certification.”

For 20 years, GPC Systems has been helping organizations plan financial systems strategies and specializing in solutions that apply today's technologies to customers' unique business needs. GPC has developed, maintained, and enhanced custom software systems and Microsoft Great Plains Accounting applications for companies and organizations throughout the Washington D.C. metropolitan area.

This year GPC launched Easy e-Bank Rec™, a powerful tool that automates all of the processes in the Microsoft Great Plains bank reconciliation program. Easy e-Bank Rec™ originated with a custom program that GPC built for one of its customers and has evolved into a successful commercial product. “The Microsoft Gold Certification gives us the ultimate level of credibility as both a partner and a developer of solutions for Microsoft Great Plains,” said Mr. Caron. “We owe a debt of gratitude to our customers, who have supported us and inspired us over the years.”
