

**Easy e-Bank Rec by GPC Systems Achieves Certified for Microsoft Dynamics GP – Microsoft’s Highest Standard for Partner Software Solutions**

Vienna, VA — 07-10-07 —GPC Systems, Inc. announced today that Microsoft has certified its Easy e-Bank Rec™ 9.5 to its highest standard for partner developed software solutions, making Easy e-Bank Rec™ one of the select software solutions to meet the new Microsoft standard.

Easy e-Bank Rec™ is the ultimate solution to Bank Reconciliation in Microsoft Dynamics™ GP. It is fast and very easy to use -- bank reconciliations usually take between 5 to 10 minutes to process, regardless of transaction volume.

Easy e-Bank Rec™ automates virtually all bank reconciliation processes in Microsoft Dynamics™ GP and offers benefits such as immediate identification of all variances between the Bank Statement and General Ledger, automatic recording of ZBA, interest and fee transactions in Microsoft Dynamics™ GP, marking all items as reconciled with the click of a button, and support out-of-the-box for the BAI2 bank statement format.

Easy e-Bank Rec™ 9.5 achieved certification by passing the new Microsoft Dynamics software compatibility test and securing recommendations from *at least ten* customer references. Certification was only possible because GPC Systems is a Microsoft Gold Certified partner and has a Microsoft Support Plan service agreement.

“GPC Systems has always been committed to software excellence and Microsoft Dynamics™ GP. Achieving the Certified for Microsoft Dynamics GP designation is a reflection of that commitment” said Guy Caron, President of GPC Systems. “The new Certified for Microsoft Dynamics GP accreditation allows Easy e-Bank Rec™ to stand out as a product the customer can rely on.”

“We are endeavoring to make it easier for customers to prioritize business critical software solutions through the Certified for Microsoft Dynamics program and the distinctive logo granted to qualifying software solutions.” Said Paul Solski, Director, ISV Sales.

**About Microsoft Dynamics**

Microsoft Dynamics is a line of financial, customer relationship and supply chain management solutions that helps businesses work more effectively. Delivered through a network of channel partners providing specialized services, these integrated, adaptable business management solutions work like and with familiar Microsoft software to streamline processes across an entire business.
